Philosophy of life

All **DORISSIMA** products reflect Doris Brugger's view of life

- **feminity/sensuality:** the natural seductiveness and sensuality that is inherent to every woman (and man) should be emphasized naturally
- **agelessness:** the philosophy of life is not aimed at a certain age group and knows no age limit
- **open-mindedness:** be open and interested in everything that is new and make this the essence of your own style
- **purist luxury:** luxury is not "gold and glamour" - it is having the time to indulge in exclusive materials, to withdraw from the flood of stimuli in everyday life and to give in to enjoyable, basic sensuality
- **new way of life:** return to the original, inherent strenght which is your very own and the strongest oasis of tranquility
- **independence:** go your way, be determined without being egoistic or egocentric
- **flexibility:** be flexible without betraying your principles but go your way
